

PC Technician Toolkit

Practice Pre-Test

Name:	Period:	Date:
-------	---------	-------

1. Identify the **ADJUSTABLE WRENCH** from the tools shown below:

A.

B.

C.

D.

E.

2. The multimeter shown below is used to measure:

- A. Voltage, Current, and Frequency
- B. Voltage, Amplitude, and Current
- C. Resistance, Voltage, and Capacitance
- D. Voltage, Current, and Resistance

3. Which of the following tools is sometimes called a slip-joint pliers.

- A. Needle Nose Pliers
- B. Ignition Wrench
- C. Lineman's Pliers
- D. Chain Nose Pliers

4. Identify the item below:

- A. Methyl Ethyl Chloride
- B. Spray Detergent
- C. Air Horn
- D. Compressed Air

5. What type of screwdriver has a plus (+) shaped tip?

- A. Standard
- B. Common
- C. Phillips
- D. Slotted

6. The appropriate method for using spray detergent to clean electrical equipment surfaces, seams, and openings is to:

- A spray a light mist over the surface and wipe up with a wipe cloth.
- B spray onto a wipe, brush, or swab and then clean the item.
- C spray the detergent into a puddle at one end of the equipment surface and then tilt it.
- D spray the detergent directly onto the equipment surface as long as it is not connected to power.

7. Which tool has a shaft and handle like a screwdriver and a hexagonal socket tip for use with hexagonal-head screws and nuts?

- A. Nut driver
- B. Hex Key
- C. Spline Key
- D. Socket Wrench

8. What is the name of the tool shown below?

- A. Screw Starter
- B. Parts Holder
- C. Retriever
- D. Grip

9. What is the worst thing that can happen if you concentrate and inhale the propellant from a can of compressed air?

- A. You can have a stroke or get brain damage.
- B. You can get high off the fumes.
- C. You can get a headache.
- D. Nothing... The propellant is nontoxic.

10. Which MULTIMETER test determines whether there is a continuous electronic path from one point to another?

- A. Voltage
- B. Continuity
- C. Resistance
- D. Impedance
